Space Passport Program

A highlight of the biannual Australian Space Forums is the Space Passport program, enabling the opportunity for students to learn about space career pathways through direct engagement with Australia's space leaders.

The Space Passport Program sessions encourage students to:

- Talk directly to companies currently involved with the Australian Space Sector,
- Ask companies about current and future careers within their industry,
- Find out about the school and tertiary pathways needed to enter the discussed careers.

Follow Hamilton Space School – Eventbrite Page to be notified when the next Space Passport Sessions are open for registration
